

TYREX PRODUCT CLEANING AND MAINTENANCE

Tyrex products are fungal and UV resistant, highly durable, easy to clean and require very little maintenance.

To clean off dust and light dirt, we recommend the use of a hard-bristled brush.

For a deeper clean we recommend using non-acidic cleaners and neutral cure soaps like dishwashing liquid or truck wash with water and a hard-bristled brush. Scrub the product in a North, South, East and West direction and rinse off and allow to dry. Do not use bleaches or petroleum-based cleaners.

Tyrex products drain naturally however we recommend that you do not fasten the product in a way that will trap water underneath product. This may cause a pungent odour and overtime mould.

When cleaning or drying always place product similarly to how you would lay it whilst in use. Do not hang the product in a way that will allow the products to flex more than 10 degrees.

For any further cleaning instructions please feel free to call our office on **02 4956 6860**

Thank you for using Tyrex for your product needs.
